

BUILD AN EVENT MANAGEMENT SYSTEM USING SALESFORE

1. INTRODUCTION

1.1 Overview

Event management is the process of creating and maintaining an event. This process spans from the very beginning of planning all the way to post-event strategizing.

At the start, an event manager makes planning decisions, such as the time, location, and theme of their event. During an event, event managers oversee the event live and make sure things runs smoothly. After an event, event managers are tasked with reviewing event data, submitting KPI and ROI findings, and staying on the ball for any post-event offerings.

All different branches of planning go into event management, including various types of sourcing, designing, regulation checks, and on-site management. In event management, you could be in the process of creating a conference, a product launch, an internal sales kick-off, or even a wedding. Really, any event that requires considerable planning and execution is event management.

1.2 purpose

The project aim is to provide real-time knowledge for all the students who have basic knowledge of Salesforce and looking for a real-time project. This project will also help to those professionals who are in cross-technology and wanted to switch

to Salesforce with the help of this project they will gain knowledge and can include into their resume as well.

2. PROBLEM DEFINITION & DESIGN THINKING

2.1 Empathy Map

2.2 Ideation & Brainstorming Map

3. RESULT

3.1 Data Model:

OBJECT NAME	FIELDS IN THE OBJECT	
	FIELD LABEL	DATA TYPE
OBJECT 1	EVENT	TEXT
OBJECT 2	ATTENDEES	PHONE
OBJECT 3	SPEAKER	TEXT AREA
OBJECT 4	VENDORS	PHONE

3.2 Activity & Screenshot

The screenshot shows the Salesforce Setup interface with the 'Custom Tabs' page open. The page title is 'Custom Object Tab' and the sub-page title is 'Attendees'. The 'Tab Label' is 'Attendees' and the 'Tab Style' is 'Helicopter'. The 'Object' is 'Attendees' and the 'Description' is 'Created by priya.kavirajya, 25/03/2023, 5:49 pm'. The 'Modified By' is 'priya.kavirajya, 25/03/2023, 5:49 pm'. The interface includes a search bar, a left sidebar with 'User Interface' and 'Tabs' selected, and a bottom navigation bar with various icons and system status.

The screenshot shows the Salesforce Setup interface with the 'Custom Tabs' page open. The page title is 'Custom Tabs'. It includes a section for 'Custom Object Tabs' with a table showing four entries: 'Attendees' (Tab Style: Helicopter), 'Events' (Tab Style: Airplane), 'Speakers' (Tab Style: Alarm clock), and 'Vendors' (Tab Style: Flag). Below this is a 'Web Tabs' section with a note: 'No Web Tabs have been defined'. The interface includes a search bar, a left sidebar with 'User Interface' and 'Tabs' selected, and a bottom navigation bar with various icons and system status.

Standard Object Permissions

The permissions defined here control access at the object level. Access to individual records within that object type is controlled by the sharing model. Set access levels based on the functional requirements for the profile. For example, create different groups of permissions for individual contributors, managers, and administrators. [How do I choose?](#)

	Basic Access					Data Administration

The screenshot shows the Salesforce Setup interface for managing Profiles. The top navigation bar includes 'Home | Salesforce' and 'Profiles | Salesforce'. The left sidebar has a search bar for 'profiles' and a 'Profiles' section under 'Users'. A message says 'Didn't find what you're looking for? Try using Global Search.' The main content area is titled 'Profiles' and contains sections for 'Individuals', 'Work Types', and 'Work Type Groups' with checkboxes for various permissions. Below this is a 'Custom Object Permissions' section with tables for 'accounts', 'Attendees', and 'Events'. The 'accounts' table shows checkboxes for Read, Create, Edit, Delete, View All, and Modify All. The 'Attendees' table shows checkboxes for Read, Create, Edit, Delete, View All, and Modify All. The 'Events' table shows checkboxes for Read, Create, Edit, Delete, View All, and Modify All. At the bottom are 'Session Settings' (Session Times Out After: 2 hours of inactivity) and 'Password Policies' (User passwords expire in: 90 days, Enforce password history: 3 passwords remembered).

5. ADVANTAGES & DISADVANTAGES

Advantage

It's the secret sauce that enables seamless integration between your sales and service organizations with no complicated, costly deployments. With the salesforce platform advantage everyone in your sales and

service organizations has a 360-degree view of every customer and their interactions with your company.

Disadvantage

Definitely not the cheapest CRM solution on the market, especially, considering the fact that salesforce subscription should be paid upfront for a year. Numerous related and hidden fees for third-party tool integration, customization. It may seem that there are always add-ons you need to buy.

6. APPLICATIONS

An event management system minimizes the steps needed to manage your events, creating a much more efficient administrative process. This way, event planners can focus more on the details, without getting lost in administrative tasks.

7. CONCLUSION

Event management system is user friendly and cost effective system, it is customized with activities related to event management life-circle. It provides a new edge to management industry. SolutionDot always keep your objectives and goals on top priority while developing any plan of work.

8. FUTURE SCOPE

It involves management, creation and development of events such as corporate conferences, wedding, festivities, formal parties etc. it involves a lot of research about the brand target audience and the concept of the event before planning the actual event.
